
Subject: FIXED Access GetMicroCandidate from RhoCandList or RhoCandidate

Dear all,

I have a RhoCandList and want to use GetMicroCandidate(), which is a function to access some specific info about detector response, and was used with TCandList.

After exchanging from TCandList to RhoCandList, I could not see same function in RhoCandidate class.

Quote:

RhoCandList all;

```
for (l=0;l<all.GetLength();++l) {
```

```
    double EMC_energy = all[l].GetMicroCandidate().GetEmcRawEnergy();
```

```
}
```

Are there similar function in the Rho package?

Best regards,
Donghee

Hi Donghee,

you can access it via

```
PndPidCandidate *mic = (PndPidCandidate*)all[l]->GetRecoCandidate();
```

```
double emc_energy = mic->GetEmcRawEnergy();
```

Best,
Klaus
