Just now I reinstalled the apr13 externals with trunk 23898.

Everything compiles correctly, but sim_complete.C which I take from macro/run, crashes with the following error.

```
-----  
Error in sim_complete.C:  
Error: Symbol FairRunSim is not defined in current scope sim_complete.C:38:  
Error: Symbol FairRunSim is not defined in current scope sim_complete.C:38:

Did you run the config.sh before?
