hi,
in jan14/macro/run/tdrct/npipi/run_ana_invariantmass_4pi_stt.c ,what does this line mean??

gStyle->SetOptFit(1011); what is 1011?

Dear Foram,

The gStyle (similar to gROOT, gMC, gGeoManager) are usually instances of the corresponding ROOT classes.

In this case you will find the necessary explanations under:

<http://root.cern.ch/root/html/TStyle.html#TStyle:SetOptFit>

So 1011 is printing all info except of ChiSq.

yours
radek
