Dear colleagues,

trying to run mar14 version I've got an error (see below). Absolutely the same configuration started from the same directory with jan14 worked without errors. What can be the reason for that?

```
root [0]
Processing tut_sim.C...
FairRootManager::OpenOutFile("sim_complete.root")
[INFO ] Media file used :
/home/anna/WORK/PANDA/pandaroot_mart14/geometry/media_pnd.geo
Info in (PndGeoHandling::Instance): Making a new instance using the framework.
-I container name PndEmcGeoPar
Error: Can't call FairPrimaryGenerator::SetEventMeanTime(10) in current scope tut_sim.C:139:
Possible candidates are...
(in FairPrimaryGenerator)
*** Interpreter error recovered ***
```

You need to comment out the line with SetEventMeanTime.
