Last week i could see it (from TU).
Now it doesn't seem to work.

Let's wait a bit. If it doesn't work we can ask someone.

I think the link should start with https, because the server tries to establish a secure connection but your browser send an http request.

It failed with http in my case, and worked with https.

Cheers,
Tayfun

Yes, you are right!

It works also for me. Thanks
