Hallo Labviewgemeinde,
hat von Euch schon mal jemand den Regler JUMO dTRON 04.1 oder JUMO dTRON 08.1
(sind nur andere Gehäuse) mit Labview angesprochen? Will nur den Sollwert setzen und den
Istwert auslesen.

Gruß Robert

Dear Robert, did you succeed in communicating with the Jumo dTRON 04.1 temperature
controller? I have written a simple vi but I get some time out issues at the visa reading. Any
help is appreciated.

Thanks!
