

this is no problem for the sorting. It is just polluting the terminal with text.

If you want to get rid of it, you have to remove 2 lines (line 2070 and 1001 in the file eventapiV50/f_evt.c

```
2069  l_temp=read(ps_chan->l_channel_no,pc_temp, ps_chan->l_io_buf_size);
2070  // printf("Read buffer %d\n",l_temp);
2071  if(l_temp == 0)          return(GETEVT__NOMORE);

1000  if(ps_chan->ps_bufhe->l_dlen <= MAX__DLEN)l_used=ps_chan->ps_bufhe->i_used;
1001  // printf("Buffer: %d words\n",l_used);
1002  ps_chan->l_buf_posi = ps_chan->l_io_buf_posi + sizeof(s_bufhe);
```

Then recompile the eventapi and recompile prespec.

Thank you very much,

it works!!

thanks again,

cheers,

Riccardo

Hi everybody,

I was trying to download the last version of the code, so I did:

```
- agatagsi@lx-pool.gsi.de:git/prespec
- ./configure --prefix=$HOME --with-gsievt-lib-path=/home/boso/prespec/eventapiV50
--with-gsievt-include-path=/home/boso/prespec/eventapiV50
- make install
```

I set the environment variables; I check and I have /home/boso/lib in the LD_LIBRARY_PATH

Everything seems fine; but when I launch the code I get the following errors:

```
cannot open module file "libprespecLYCCA.so": /home/boso/lib/libprespecLYCCA.so:
undefined symbol: GOMP_parallel_end
module file is not open
ERROR: Controller config: In file ./Daq/unpack_user.config line 22: library LYCCA has no
unpacker with name v830
module file is not open
ERROR: Controller config: In file ./Daq/unpack_user.config line 23: library LYCCA has no
unpacker with name v1290TMM

module file is not open
ERROR: Controller config: In file ./Daq/unpack_lycca.config line 26: library LYCCA has no
unpacker with name v785
module file is not open
...

```

and so on..

So it is a problem related with GOMP_parallel_end which doesn't permit to load the libprespecLYCCA.so library; it seems OpenMP was not properly linked during the compilation, or something similar; do you have any ideas on how to fix it?

Thank you,
Cheers,

Alberto

Hi Alberto,

some time ago I used OpenMP to make selfcalibration of DSSSD faster on multicore machines.

I removed this now since it seems to causes problems one some systems.

You can pull again. The error should be gone.... post again if not

Michael
