Dear all,

as already discussed in the last software SeeVogh meeting, we would like to invite you to participate in this questionnaire about your experience with the Panda software.

We would like to collect your experience, your comments, your troubles, for a better understanding of our users and how to improve the framework. This questionnaire is meant for all the people using the software at every level, both beginners and core experts, using it each day or maybe just starting with the installation.

Please fill the questionnaire, we hope to see a lot of answers, since your opinion is very important to us.
