Hi,

I am trying to install Fairsoft-dec14 on ubuntu 14.04 32 bit. While doing ./configure.sh, I am getting following errors. The log file is also attached here. Can some help me in debugging the problem.

```

Hi,

I tested this release on Ubuntu 14.04 and it worked without any problem, could it be that the download of the gsl-1.16.tar.gz file did not finished properly? can you try to unpack this file your self (it is in FairSoft/basics directory). if this file is corrupted, please delete it and run the configure again.

Cheers,

Mohammad

Hi ,

Thank you very much for your reply. The gsl-1.16.tar.gz file was corrupted and downloaded that file separately, put in FairSoft/basics directory, and it works.

But the same problem happened again while downloading pythia6.tar.gz. I tried to resolved by the same way, but getting another issue.

-- Configuring done

CMake Error at CMakeLists.txt:33 (Add\_Library):

Cannot find source file:

pythia6416.f

Tried extensions .c .C .c++ .cc .cpp .cxx .m .M .mm .h .hh .h++ .hm .hpp  
.hxx .in .txx

-- Build files have been written to:

/home/kamalpdutta/PANDA/FairSoft-dec14/generators/pythia6/build

make: \*\*\* No rule to make target `install'. Stop.

scripts/install\_pythia6.sh: line 42: check\_all\_libraries: command not found

\*\*\* ERROR: Pythia6 could not be created.

\*\*\* End installation of external packages with Errors\*\*\*

Can you please help me ?

regards

Kamal Dutta
