Subject: New PandaRoot release mar15

Posted by StefanoSpataro on Fri, 27 Mar 2015 17:31:07 GMT

Dear all,
I have created a new PandaRoot version, namely mar15, with trunk revision 27294.
This release works with the new git packages, mar15 for FairSoft and v-15.03 for FairRoot. It does not work with apr13 anymore.

In order to download it:

svn co https://subversion.gsi.de/fairroot/pandaroot/release/mar15

Remember to follow the installation instructions in wiki, which are different than the pre-git age.

This is now the suggested version for analysis. The major difference compared to oct14 is the partial fix of EMC MonteCarlo truth matching.
