Dear all,
due to sourceforge maintenance, you are not able to access to the genfit/genfit2 svn repositories, and if you do an update you will see the following errors:

```
svn: warning: W200000: Error handling externals definition for
'/Users/spataro/fairsoft_mar15p1/pandaroot/GenfitTools/trackrep/RKTrackRep':
svn: warning: W120108: Unable to connect to a repository at URL

```

In any case the remaining pandaroot svn repository is fine, then you can continue to work. If you need to do a checkout from scratch, genfit packages will not be downloaded and you cannot compile pandaroot. In such a case, I suggest to wait that sourceforce become

operational again.

Hi,

in the moment there are problems with the installation of FairSoft. The SourceForge servers are down and we can't download the vgm code from there. Until this is fixed we provide the code manually from our webpage. Instructions can be found at

The connectivity problem should not be present anymore.
