
Subject: [FIXED] cmake error while installing pandaroot latest trunk version.

Posted by Ajay Kumar on Fri, 24 Jul 2015 11:12:35 GMT

[View Forum Message](#) <> [Reply to Message](#)

Hi,

I have installed external package and fairroot as explained in following link on my ubuntu 14.10 system.

https://panda-wiki.gsi.de/foswiki/bin/view/Computing/PandaRootInstallGit?validation_key=%3f149c4cff8aca2cfa1925c812827bb44c

When I am going to install pandaroot latest trunk from the below link.

svn co <https://subversion.gsi.de/fairroot/pandaroot/trunk> pandaroot

I had initially error related to genfit while running cmake in pandaroot build directory and then I comment out genfit directory in CMakeLists.txt.

Now it shows error related to genfit2. screen output is following:

```
ajay@ajay:~/fairsoft_mar15/pandatrunk/buildPanda$ cmake ../

Hello Ajay,

you need to set up FAIRROOTPATH as indicated in the wiki:

https://panda-wiki.gsi.de/foswiki/bin/view/Computing/PandaRootInstallGit?validation_key=%3f2fc8f1252fa6a9526c9a25057e2975c0

Please, make sure also to setup SIMPATH properly.

Indeed, the error on genfit and GenfitTools is due to the non available server, for the time being.

Stefano sent an email how to proceed in such a case, some days ago. You can find

instructions here:

<https://fairroot.gsi.de/?q=node/101>

Then, everything should work fine.
I hope it helps,

Elisabetta

The connectivity problem should not be present anymore.
