Hi all,

trying to build GammaWare with gcc5.1 I get problems

with update svn and from a clean build directory I get

Scanning dependencies of target dolog

any ideas?

will look into it from here

cheers

Joa

Hi,

problem solved...

so doing cmake ...
and after that
ccmake
to change stuff does not work, gives error from above

Just running
cmake -D.... with whatever should be there works

cheers

Joa

ps. Under root5.34/30
