Dear all,

I am doing some tests in a new trunk, rev-28737. In testing reconstruction with genfit2, I see very often the message:

>>> PndEmcHitProducer::Exec Skipping Module 10 (FscFiber)

When I had tested genfit2 with rel-oct14, this message never showed, as well as I remember. Can anybody explain to me what it is referred to?

thanks in advance, Elisabetta

Sure, it is warning.

If you consider it is normal, fine. One warning more to the list...

cheers, Elisabetta
