Dear all,
if you are planning to present a contribution for the computing sessions at the next Collaboration Meeting, please let me know as soon as possible, writing the title of the talk and the requested time.
At present we foresee two computing sessions on Tuesday morning.

The following is a list of the requests I have received so far:

- * Konstantin Beloborodov - Forward RICH simulation
 - * Jennifer Puetz - Updates on the kinematic vertex fitter
 - * Dominik Steinschaden - Updates on SciTil software
 - * Alicia Sanchez - Report on hypernuclei analysis
 - * Stefano Spataro - New macros style
 - * Ludovico Bianchi - Updates to the Circle Hough trackfinding algorithm
 - * Denis Veretennikov - Forward TOF simulation in PANDA ROOT
-

Dear Stefano, we would like to contribute with a short talk reporting about some issues observed during the simulation of the stopping processes of unstable strange heavy particles. Results related to the comparison of geant3 with geant4 are going to be shown as well.

best regards
Alicia, Sebastian and Marcell

Dear all,
I believe these are points which do not fit in a parallel session during the collaboration meeting, but better to discuss in a SeeVogh where more time can be given to technical details. I can schedule a presentation at the next software seevogh, if you agree.

OK,
thanks Stefano.

regards
alicia

Dear Stefano,
yes in principle it will be ok.
Thanks for support
best
Alicia.
