I tried to install R3BRoot on GSI PC lxg0898, with Garfield support.
It worked up to the last make:

```
[100%] Generating G__R3BMacroCompilerDict.cxx, G__R3BMacroCompilerDict_rdict.pcm,  
..../lib/libR3BMacroCompiler.rootmap  
Scanning dependencies of target R3BMacroCompiler  
[100%] Building CXX object  
compilehelper/CMakeFiles/R3BMacroCompiler.dir/R3BMacroCompiler.cxx.o  
[100%] Building CXX object  
compilehelper/CMakeFiles/R3BMacroCompiler.dir/G__R3BMacroCompilerDict.cx.o  
Linking CXX shared library ..../lib/libR3BMacroCompiler.so  
[100%] Built target R3BMacroCompiler  
Install the project...  
-- Install configuration: "RelWithDebInfo"  
-- Installing: /usr/local/include/R3BModule.h  
CMake Error at r3bbase/cmake_install.cmake:36 (FILE):  
  file INSTALL cannot copy file  
  "/d/land2/kisselev/R3BRoot/r3bbase/R3BModule.h" to  
  "/usr/local/include/R3BModule.h".  
Call Stack (most recent call first):  
  cmake_install.cmake:37 (INCLUDE)
```

make: *** [install] Error 1

Any idea what is a problem?

Regards, Oleg.

Do you call "make install"? It is not needed for R3BRoot and will not work. Just "make". The problem is that the default installation path is /usr/local, and you do not have write permissions to it.

Regards,
Dima

Hi,

OK, I used finally the installation of garfield that Hans made for the whole R3B group at /u/land/htt/garfield

The R3BRoot compiled with it.

Something is still wrong. The first trial to run:

```
root -l r3bsim.C  
at /d/land2/kisselev/R3BRoot/macros/r3b/actar  
crashed:
```

Processing r3bsim.C...

Dear Oleg,

have you configured your shell before running the ROOT macro?

```
cd YOUR_R3BROOT_BUILD_DIRECTORY  
. ./config.sh
```

Then go to macros/r3b/actar folder and run the macro.

If you did so, post here the output of:

```
echo $LD_LIBRARY_PATH
```

Best regards,
Dima

Hi Dima,

actually I did and saw:

System during compilation: Debian GNU/Linux 7.11 (wheezy)

x86_64

System now : Debian GNU/Linux 7.11 (wheezy)

x86_64

```
echo $LD_LIBRARY_PATH
```

```
/d/land2/kisselev/R3BRoot/build/lib:/u/land/htt/garfield/install/lib:/cv  
mfs/fairroot.gsi.de/gcc_4.8.4/fairroot/v-16.06_fairsoft-may16_root6/lib:  
/cvmfs/fairroot.gsi.de/gcc_4.8.4/fairsoft/may16_root6/lib/root:/cvmfs/it  
.gsi.de/compiler/gcc/4.8.4/lib64:/cvmfs/fairroot.gsi.de/gcc_4.8.4/fairso  
ft/may16_root6/lib/root:/cvmfs/fairroot.gsi.de/gcc_4.8.4/fairsoft/may16_ root6/lib
```

Now I did again the:

```
cd /d/land2/kisselev/R3BRoot/build
```

```
. ./config.sh
```

```
echo $LD_LIBRARY_PATH
```

```
/d/land2/kisselev/R3BRoot/build/lib:/u/land/htt/garfield/install/lib:/cv  
mfs/fairroot.gsi.de/gcc_4.8.4/fairroot/v-16.06_fairsoft-may16_root6/lib:  
/cvmfs/fairroot.gsi.de/gcc_4.8.4/fairsoft/may16_root6/lib/root:/cvmfs/it  
.gsi.de/compiler/gcc/4.8.4/lib64:/cvmfs/fairroot.gsi.de/gcc_4.8.4/fairso  
ft/may16_root6/lib/root:/cvmfs/fairroot.gsi.de/gcc_4.8.4/fairsoft/may16_ root6/lib
```

and it seems to be working. No idea why...

Oleg.
