Subject: Still problem with external packages & Root 6
Posted by Albrecht Gillitzer on Wed, 17 May 2017 13:55:51 GMT

Hi

I tried again to install FairSoft with Option 4) Optimize and Debug Info this time.
Again the installation stops with the same error message, and I see only two small log files as before.
Where is the debug info? And how should I proceed?

Please help!

Albrecht

The packages numpy-dev had to be installed.

Cheers,

Tobias
