I have installed fairsoft_may16p1 and then after I installed successfully FairRoot-16.06. now I am facing following error during installing jan16 pandaroot.

-- NOT Found FAIRBASE

CMake Warning at CMakeLists.txt:73 (find_package):

By not providing "FindFairRoot.cmake" in CMAKE_MODULE_PATH this project has asked CMake to find a package configuration file provided by "FairRoot", but CMake did not find one.

Could not find a package configuration file provided by "FairRoot" with any of the following names:

FairRootConfig.cmake
fairroot-config.cmake

Add the installation prefix of "FairRoot" to CMAKE_PREFIX_PATH or set "FairRoot_DIR" to a directory containing one of the above files. If "FairRoot" provides a separate development package or SDK, be sure it has been installed.

CMake Error at CMakeLists.txt:78 (include):

include could not find load file:

FairMacros

CMake Error at CMakeLists.txt:79 (include):

include could not find load file:

So please give me a valuable suggestions or a clue for resolving this errors...

Thank you.

Dear KevalGandhi,

Did you do the second step (make install) for FairRoot?
Make sure you have SIMPATH and FAIRROOTPATH set to the appropriate installation directories.

Cheers!
Ralf

Dear KevalGandhi,

you should install the official versions of FairSoft, FairRoot and PandaRoot as they are written on the PandaRoot wiki page.

Cheers,

Tobias

Hello Tobias,

Thank you for reply

for pandaroot dec 17(latest version) which version of fairroot and fairbase I should use?

Thank you...

Do you have access to the PandaRoot wiki page? If not please register here:
https://panda-wiki.gsi.de/foswiki/bin/login/Computing?fswiki_origin=GET%2cview%2c/cgi-bin/view/Computing

Cheers,

Tobias

Thank you Tobias,

I will try...
