Hello,

here you will find a preliminary version of my poster for the Pisa Conference next week on Elba, of the Panda Barrel ToF.

We are waiting for the delivery of the new Railboard, which should arrive on the 23rd. Once it is here I will try to get some measurements on the crosstalk levels of the different designs. For this I've kept a hand drawn plot as a space holder in the poster whih I will update before frieday.

I will also be adding Information to the reference section.

Comments and suggestions are welcome!

Sebastian
