Dear all,

I have just been attempting a fresh R3BRoot installation on a new PC.
FairSoft and FairRoot were installed without any problems, but for R3BRoot I got the following error:

```

Could anyone help me?

Yours Sincerely,
Christiaan Douma.

We provide guarantee that the dev branch of R3BRoot will work with the latest stable releases of FairSoft and FairRoot (but not their dev versions).
Please use jun19p1 and v18.2.1

Best regards,
Dima

Are these the current master versions? If not, what is the github download link of these specific versions?
