Hi all,

I have recently installed R3BRoot on Ubuntu18.04 on a virtual machine. When I run the test simulation (run\_sim.C) I get an error at the end relating to multi-threading. Do you have any idea about this error and how can I fix the problem?

The full log.txt file is attached herewith.

Greetings,  
Maisam

Hi.

Probably, you have installed FairSoft with geant4 in multi-threaded mode. This mode is not yet supported by R3BRoot. Please re-install in single-threaded.

Best regards,  
Dima

Thanks a lot Dmytro. Yes, I installed the fairsoft in multi-thread mode. I will reinstall it and check it again.

Greetings,  
Maisam
