Hi,

VRVS is a Virtual Room Videoconferencing System, http://www.vrvs.org/index.php.

It is already in use in the HEP and GRID community. May we can adopt this system for the FAIR activities as well.

Regards Holger

Hi,

MARRATECH is another conferencing tool, http://www.marratech.com/.

It is commercial, but a free version for up to 5 attendees is available, too. It has a good chance to become selected for GSI.

Regards Holger
