The 4th PANDA Grid Workshop in Vienna finished at the end of last week, with a lot of objectives accomplished:

- * Reviewed jdl syntax, package distribution and job submission knowhow
- * Upgraded gridware to v2-13; converted catalogue; applied alien software patch via PackMan
- * Updated wikis
- * Reviewd PackMan features
- * Installed latest ML-enabled version of pandaroot (grid version 0.2)
- * Solved various compilation issues on several platforms
- * Successfully ran the EMC simulation, digitization, reconstruction and analysis chain presented by Soeren Lange in his talk at GSI on 18/09/2007
- * Enhanced gridpp job execution access
- * Worked towards a binary pandaroot distribution
- * PandaRoot jobs successfully run during workshop week: 1000+
