Hi all,

We changed the version UrQMD_SMM with Xi-Xi_bar production
in every event.
With the new version I have calculated 10000 Events pbarC interaction at 3GeV/c.
I removed old files from public directory
/d/panda02/urqmd_smm/Ksi_prod
and put here new file:
"apC_Xi_3GeV.root".

Please, write me about other needed calculations with the UrQMD_SMM with Xi-Xi_bar.

Good luck,
Aida
