Dear all,

We will have a data challenge (DC) lasting three days or 10000 jobs, starting April 17. The proposed statistics that we will collect will be job success rate and site jobs distribution. The results will be posted on our wiki.

If you are a PANDA Grid site administrator, could you please double
check your site's status and prepare for the DC ?

Any other suggestions on this DC are welcome.

Cheers,
Dan
