---

By summer 2008 we will start collecting the DCS requirements (regarding physics signals, parameters, interdependencies) from the target and magnet groups and from all detector subgroups.

A wiki describing the structure of the DCS requirements database is located at:

<http://panda-wiki.gsi.de/cgi-bin/view/DCS/DCSRequirementsDB>

Comments and suggestions on the format, structure and implementation of the Database and/or interface are welcome.

Dan
