Dear all,

we will have a PandaRoot tutorial in Ferrara.

The topic will be "PandaRoot on the grid" (i.e. how to submit a charmonium benchmark channel simulation with all detectors with global tracking and kalman filter and rho reco to the grid) and it will be given by Dan Protopopescu and Kilian Schwarz.

The tentative date is:

FRIDAY Sep 12, 09:00-13:00

(parallel to the coordination board meeting).

PLEASE MARK YOUR CALENDARS!!

(and please keep it in mind for the flight and hotel booking!)

-- Dan, Johan, Kilian, Soeren
