Hello,

I found a bug (segfault) in PndTof.cxx (my current rev. 4443). On line 449 the pointer PndGeoTofPar* par=(PndGeoTofPar*)rtdb->getContainer("PndGeoTofPar"); is created, while the class member par already exists (see PndTof.h, l.144). A renaming of the member variable or removing the "PndGeoTofPar*" would suffice.
I've no permission to check in.

Kind regards, Ralf.

Hi Ralf, i have changed it.
For it is working.
please ckeck it and let me know!!
regards
Alicia.

Hi Alicia,

It works. Thanks for the fast fix.

Greetings, Ralf.
