Dear all,

Since recently, Mohammad, Florian, and Denis, successfully enabled the ticket system for bug reports on the "subversion" website

<https://subversion.gsi.de/trac/fairroot>

The idea is that bugs and fixes should be reported via this site in stead of using the forum. The assignment of the tickets will - at least for the moment - be done by Mohammad, Florian, or Denis. Developers will automatically receive an email in case a ticket has been assigned to him/her. Note that you can also "login" to this system using your own svn account. Well, just try it out. It should be self-explanatory.

We will keep this forum site (Bugs, Fixes, and Releases) to also allow for issues which require a discussion among more users and developers and for more general items.

Enjoy and thanks to our GSI colleagues,

Johan.
