Hello PandaRoot developers,

has anyone tried compiling the FAIRSoft and PandaRoot software on Snow Leopard yet? Any problems so far?

Cheers,
Gordon

you are fast....that system is not official supported yet
well, maybe Mohammad/Florian tried it already?!?

Johan.

Not that fast, not tried it myself yet! Just wondered if anyone else had taken the plunge before I upgrade my main machine

Hi,

Snow leopard is only available since 28.08.09, we order it but still waiting for it! I already tried with ADC seeds and it works without problems, so I do not expect any problems with the official release.

regards

Mohammad
