Dear colleagues,

During last two days, the batch job with option "batch" is not properly accepted in GSI.
Now I'm trying to use GSI batch job with several other queues, namely "dgrid".

After submitting my job with "dgrid" I have got following message,

Quote:
dgrid: User cannot use the queue. Job not submitted.

Is it not available, right now?

Thank you!

Hi

This queue is restricted. Not all queues at GSI are available for all users.

By the way. Is your program a 32- or 64bit program?

Ciao

Florian

Dear Florian Uhlig,

In my understanding, "batch" corresponds only with 64bit.
So I use 64bit program.

By the way, is the "betch64_24h" queue also restricted?

Best wishes,
Donghee

Hi

The "batch" queue is 64bit, so you have to use a 64bit program. If you have a 32bit program you should use the queue "betch32".

I don't know the queue "betch64_24h" and according to the system this queue does not exist.

Ciao

Florian
