
Subject: Mvd code update

Posted by [Ralf Kliemt](#) on Sat, 15 May 2010 21:25:20 GMT

[View Forum Message](#) <> [Reply to Message](#)

Hello everybody,

tonight I merged the development branch of the mvd, sds and pnndata/Sdsdata packages to the trunk. The following issues are addressed:

- Mvd inherits now from Sds (like all semiconductor detector systems shall do i.e. lumi/lmd and hyp)
- Introduction of time-over-threshold electronics emulation
- shorter (integer) IDs for detector volumes
- several bugfixes & cleanups

I think, since it never ran on any system outside of the mvd developers, it is better not to add it to the next release.

Please give your feedback if something looks odd.

Thanks, Ralf.

Credits to Tobias Stockmanns & David Pohl. (May they be added to Johans funny statistics)

Hello,

I have seen that the mvd digitization is hanging many qa macros.

In particular, I have tried macro/qa/lhetrack/run_digi_tpccombi.C, and the macro stucks at the first event.

By commenting out some tasks, I have realized that the guilty guy is PndMvdClusterTask. Is it possible to check what is going wrong there?

Hi,

thanks for the fix. Now I have seen there is a last problem in the reconstruction code.

Once I launch macro/qa/lhetrack/run_reco_tpccombi.C I have the following crash:

Toggle Spoiler

```
*** Event # 1
===== PndLheHitsMaker =====
Total number of hits for tracking: 63
Total number of tracks in TPC: 2
    Good tracks in TPC: 1
Working with 63 hits
found 1 tracks
finder : Real Time = 0.01 seconds Cpu Time = 0.00 seconds
===== PndLheTrackFitter =====
Number of tracks for fitting 1

*** Break *** segmentation violation
```

=====

There was a crash (#7 0x009793b0 in SigHandler ()).

This is the entire stack trace of all threads:

=====
```

I suppose something is screwed in the mvd reco hit.
Morevoer, in the sim hundreds of mvd volumes are written in the log, maybe it could be the
case to "verbose" it by a flag.

Hello guys,

Thanks for posting the segfault. I think I know what to do.

Cheers, Ralf.
