Dear all,

There is now a new a step-by-step tutorial on installing EPICS and CSS, setting up a toy system and writing your first GUI:

http://nuclear.gla.ac.uk/twiki/bin/view.pl/Main/CSSGUIs

This page is linked in the "Tutorials & HowTos" section of our wiki

http://panda-wiki.gsi.de/cgi-bin/view/DCS/EpicsWiki#Tutorials_and_HowTos

and there's also an entry about it in our eLog:

http://panda-controls.gsi.de/DB/eLog.php?nav=Goto&entry=31

Special thanks to Florian Feldbauer and Christof Motzko for providing examples.

Best regards,
Dan

P.S. I will not be able to travel to Groningen for the next PANDA CM, so I guess there will be no DCS session this time.
