
Subject: error messages from initialization

Hi all,

running my simulation macro, I see the following complaints during the initialization:

Quote:Error in <PndEmcGeoPar::init()>: PndEmcGeoPar not initialized
Error in <PndSensorNamePar::init()>: PndSensorNamePar not initialized
Error in <FairRuntimeDb::initContainers()>: Error occurred during initialization

It seems to be no problem for my simulation, but maybe somebody knows how to cure it.

Ciao,
Olaf.

Don't look at me...
However, it is a "normal" error message, even if this has to be fixed somehow. It does not
effect the simulation (hopefully).
