in compilation I get the following error :

```
[ 46%] Generating tpcEveDict.cxx, tpcEveDict.h
Error: cannot open file "TEveBox.h"
/u/gboca/panda/installazione_31jan11/pandaroot/tpc/TestBench/PndTpcClust Vis.h:34:
Warning: Error occurred during reading source files
Warning: Error occurred during dictionary source generation
!!!Removing /u/gboca/panda/installazione_31jan11/pandaroot/buildPanda/tpc/tpcEveDict .cxx
/u/gboca/panda/installazione_31jan11/pandaroot/buildPanda/tpc/tpcEveDict .h !!!
Error: /misc/cbmsoft/Etch32/jan10/fairsoft/tools/root/bin/rootcint: error loading headers...
make[2]: *** [tpc/tpcEveDict.cxx] Error 1
make[1]: *** [tpc/CMakeFiles/TpcEve.dir/all] Error 2
make: *** [all] Error 2
```

is that related to the new root version/graphics package ?

Please experts advice, thanks
Gianluigi

Hi,

TEveBox is not available in ROOT 5.26 (jan10 of the external packages!) so you have to use either feb11 (root 5.28) or trunk (root 5.29.1).

regards

Mohammad

Hi,

actually I don't need the TEveBox at the moment, so I took it out of the header. It should compile now also with root 5.26.

regards,

Johannes
