Dear all,

the pbar p -> pi+pi- event generator which we recently developed and presented in the last Panda Collaboration meeting in September (monday 05-09-2011, computing session, "a Monte Carlo event generator for pbar p -> pi+pi-, Manuel Zambrana) is now available in the current /trunk version of PandaRoot.

Full documentation can be found at:

http://panda-wiki.gsi.de/cgi-bin/view/PANDAMainz/EventGenerators

We hope you find it useful!

best regards,
Dmitry and Manuel

Hi,
good!
Would you like to give a short presentation at the next evo meeting this friday at 10?

Unfortunately I won't be able to do it because I have another meeting on Friday.
