---

Dear Colleagues,  
after a short break I try to install latest version of PANDARoot on ixi038 in my home dir. I follow the instruction described in:  
<http://cbmroot.gsi.de/installation/Installing%20PandaRoot.htm>  
Everything is working OK up to  
make

```
I've got an error message:
[ 39%] Building Fortran object

Does anyone know this problem ?  
Best Regards, Yuri.

Hallo Yuri,

You are using the wrong externals! you are on a Lenny32 linux and link against Etch32. Set your SIMPATH to Lenny32 and recompile again.

regards,

Mohammad

Dear Mohammad,  
after setting to:  
export SIMPATH=/misc/cbmsoft/Lenny32/jan10/fairsoft/  
I did cmake ../  
and make but I've got:

```
naryshk@lxi026:~/pandaroot_new/pandaroot/buildPanda $ . ./config.sh
System during compilation: Debian GNU/Linux 5.0 n l
                          i686
System now                : Debian GNU/Linux 5.0 n l
                          i686
naryshk@lxi026:~/pandaroot_new/pandaroot/buildPanda $ make
-bash: make: No such file or directory
```

```
naryshk@lxi026:~/pandaroot_new/pandaroot/buildPanda $ ls
-bash: ls: No such file or directory
```

What does it mean?

Best Regards, Yuri.

Dear Yuri,

It means that somehow your PATH is not set anymore! Simply open a new shell set your SIMPATH and try again.

regards

Mohammad

Dear Mohammad,  
now everything is go further, but a new error appeared:

```
[ 47%] Building CXX object tpc/CMakeFiles/Tpc.dir/TestBench/PndTpcSLResidualTask.cxx.o
[ 48%] Building CXX object tpc/CMakeFiles/Tpc.dir/TestBench/PndTpcResidualTask.cxx.o

Hallo Yuri,

Is there any reason why you use the Jan10 externals? if not then maybe it would be better to use the may11, i.e:

```
export SIMPATH=/misc/cbmsoft/Lenny32/may11/fairsoft/
```

about the problem you have, I have no idea, maybe one of the TPC experts can answer this.

regards,

Mohammad
