Hi,

i again have the problem that i deleted all my files but fquota_list still states

```
-----
              user      nbFiles              totalSize(M)
-----
[0001. ]      pitka    90953/100000      525279.5569/559154.5105
-----
```

Is there some solution to this?

Best regards and thanks a lot in advance

Andreas

Dear Andreas,

I doubled your file quota for now and will investigate:

```
[pgdb2.gla.ac.uk:3307] /panda/user/a/admin/ > fquota set pitka maxTotalSize 1000000000000
Dec 14 11:10:40 info
```

```
-----
              user      nbFiles              totalSize(M)
-----
[0001. ]      pitka    90895/100000      525076.4127/953674.3164
-----
```

Cheers,
Dan
