hello,
this is the compilation crash I get with the updated (just now)
trunk :

cc1plus: error: /misc/cbmsoft/Lenny64/may11/fairsoft/tools/root/include: Permission denied
make[2]: *** [fairtools/CMakeFiles/FairTools.dir/FairLogger.cxx.o] Error 1
make[1]: *** [fairtools/CMakeFiles/FairTools.dir/all] Error 2

does it sound familiar to anyone ?

Gianluigi

Dear Gianluigi,

it is a file system problem which is already there since yesterday. I put already a ticket to the
GSI linux group.

Cheers
Olaf.

it is a file system problem which is already there since yesterday. I put already a ticket to the
GSI linux group.

Cheers
Olaf.

I went directly to the LInux system manager here at GSI, now it should work

Gianluigi
