I encounter problems with packman on many sites which I have seen before in my life, but don't know the cause anymore... Well here it is, related to "get"....any clue?

johan.

----- HERE -----

Feb 15 13:18:58 info 2632 Installing package urqmd (V root529)

Unknown option: 2

Feb 15 13:18:58 info Error parsing the arguments of [get]

get: copies a file from teh file catalogue to the local computer:

Usage : get [-<options>] <file> [<localfile>]

Options:

-n:

-o:

-g: The file is a guid instead of an lfn

-s [<se>][,!<se>]* : Retrieve the file from the se <se> and/or don't use the list of !<se>

-x Ignore local cached versions of the file and always try to retrieve it from the original storage.

Get can also be used to retrieve collections. In that case, there are some extra options:

-c: Retrieve all the files with their original lfn name

-b <name>: Requires -c. Remove <name> from the beginning of the lfn

Feb 15 13:18:58 info 2632 Starting the uncompress...

tar (child): 0: Cannot open: No such file or directory

tar (child): Error is not recoverable: exiting now

tar: Child returned status 2

tar: Error is not recoverable: exiting now

Feb 15 13:18:58 info Something failed. Removing the directory
