Dear all,

digi macro produces the following error with trunk 14706 and some other revisions too, but it works with nov11 release.

```
...
*****
initialisation for run id 1151881509
*****
Container PndGeoSttPar initialized from ROOT file.
Container PndSensorNamePar initialized from ROOT file.
MVDPixelDigiPar initialized from Ascii file
MVDPixelTotDigiPar initialized from Ascii file
MVDStripDigiParRect initialized from Ascii file
MVDStripDigiParTrap initialized from Ascii file
MVDStripDigiParTD initialized from Ascii file
MVDStripDigiParTS initialized from Ascii file
MVDStripTotDigiParRect initialized from Ascii file
MVDStripTotDigiParTrap initialized from Ascii file
MVDStripTotDigiParTD initialized from Ascii file
MVDStripTotDigiParTS initialized from Ascii file
Container PndEmcGeoPar initialized from ROOT file.
Container PndEmcDigiPar initialized from ROOT file.
PndEmcRecoPar initialized from Ascii file
[ERROR ] init() PndMdtRecoPar not initialized
```

*** Break *** segmentation violation

Does anybody know what is wrong and/or how to fix it?

Cheers,
Dmitry

Hi,
as I was pointing during the evo meeting, you should comment out fts in the simulation macro.
Please try and let me know if it works or not.

Thanks to Mohammad now this is fixed. Please update your fts folder and uncomment Fts.
