
Subject: [SOLVED] about version "1.6.17"-- FairRoot Revision - 15449 Branch
Posted by [Valerica Baban](#) on Sun, 17 Jun 2012 17:58:51 GMT
[View Forum Message](#) <> [Reply to Message](#)

After I made some changes in a macro I had to do "make" and I got this :

```
[vali@david buildcbm]$ make
I am here.
-- Found Subversion: /usr/bin/svn (found version "1.6.17")
-- FairRoot Revision - 15449 Branch - https://subversion.gsi.de/fairroot/cbmroot/trunk

[ 45%] Built target Trd
[ 52%] Built target Ecal
CMake Error: Cannot open file for write:
/home/vali/cbmroot/buildcbm/zdc/CMakeFiles/Zdc.dir/depend.make.tmp
CMake Error: : System Error: Permission denied
Scanning dependencies of target Zdc
CMake Error: Directory Information file not found
CMake Error: Cannot open file for write:
/home/vali/cbmroot/buildcbm/zdc/CMakeFiles/Zdc.dir/depend.make.tmp
CMake Error: : System Error: Permission denied
make[2]: *** [zdc/CMakeFiles/Zdc.dir/depend] Error 2
make[1]: *** [zdc/CMakeFiles/Zdc.dir/all] Error 2
make: *** [all] Error 2
```

What would be the problem and how can I fix it ?

Thank you very much.

Hi Valerica,

this looks like a problem with your local filesystem. You are not allowed any longer to write to the ZDC directory in the build directory. Can it be that you have no space left on your filesystem?

You can try to remove the following directory

`/home/vali/cbmroot/buildcbm/zdc`

and run make again.

Ciao

Florian

Hi Florian

I have almost 150 Gb free . Today I performed an update to revision 15775 and this is the output after "make" command :

```
[vali@david buildcbm]$ make

Thanks to Florian the problem was solve . It was about the file permissions because it seems that I made build directory and cmake as root and then I tried to do an update like an usual user . So I remove the initial build directory and I reconfigured all like an usual user.

Sorry for the delay .
