Dear all,

I'm trying to install the september 12 external package but I have the following error in the Geant3 installation:

```
cp: cannot stat `/home/fioravanti/sep12/transport/geant3/lib/tgt_linux/libgeant321.so': No such
file or directory
```

```
**** Checking libraries in /home/fioravanti/sep12/lib ****
```

```
*** ERROR: Geant3 could not be created.
```

```
*** End installation of external packages with Errors***
```

I tried to follow the previous suggestion given by Florian

https://forum.gsi.de/index.php?t=tree&th=3532&start=0&rid=1093&S=f4de3f27af7c6c5b85a834379bd2150b#page_top

but it doesn't solve the problem in this case.

Could please anyone help me?

Thanks in advance,

Elisa
