

Dear all,

I am running PandaRoot rev. 17558 with sep12 external packages on Ubuntu 12.04.

I run official the macros from macro/run.

I have commented out the DIRC and set FTS to inactive in sim_complete.C with:

```
FairDetector *Fts= new PndFts("FTS", kFALSE); // FTS is inactive
```

Until pid macro everything is looking good for 1000 events, but the pid macro does not run.
Here is what I think is the essential part of the output.

Toggle Spoiler

```
I- FairGeane::FairGeane: Geane is Initialized
[INFO ] Branch: FtsIdealGenTrack not found in Tree
[INFO ] Branch: FtsIdealGenTrack not found in Tree
-I- PndPidCorrelator::Init: No 2nd PndTrack array!
[INFO ] Branch: PidChargedCand not found in Tree
[INFO ] Branch: PidChargedCand not found in Tree
-I- PndPidIdealAssociatorTask::Init: No PndPidCandidate array PidChargedCand there!
InitStatus PndPidMvdAssociatorTask::Init()
[INFO ] Branch: PidChargedCand not found in Tree
[INFO ] Branch: PidChargedCand not found in Tree
-I- PndPidMvdAssociatorTask::Init: No PndPidCandidate array PidChargedCand there!
InitStatus PndPidMdtHCAssociatorTask::Init()
[INFO ] Branch: PidChargedCand not found in Tree

-I- PndPidDiscAssociatorTask::Init: No PndPidCandidate array PidChargedCand there!
[INFO ] Branch: PidChargedCand not found in Tree
[INFO ] Branch: PidChargedCand not found in Tree
-E- PndPidSttAssociatorTask::Init: No PidChargedCand array!
InitStatus PndPidEmcBayesAssociatorTask::Init()
[INFO ] Branch: PidChargedCand not found in Tree
[INFO ] Branch: PidChargedCand not found in Tree
-I- PndPidEmcBayesAssociatorTask::Init: No PndPidCandidate array PidChargedCand there!
[INFO ] The number of entries in chain is 1000
[INFO ] The number of entries in chain is 1000
```

For a diff I have attached the outputs of the pid macro when I run the entire simulation chain with active FTS (withFTS.txt) and with inactive FTS (noFTS.txt).

Why have you commented out fts? In this way the FtsIdealGenTrack is not existing, then in the PidCorrelator you have to comment out the second input.

Thank you Stefano! After commenting out

```
corr->SetInputBranch2("FtsIdealGenTrack");  
corr->SetInputIDBranch2("FtsIdealGenTrackID");
```

the macro works.

I want to compare results for the X simulation with and without the FTS, therefore, I was running a simulation with inactive FTS.
