Please tell me how can I solve this Error? this I have got in some macros at the time of running

```
shyam@shyam-vaio:~/fairsoft/pandaroot/macro/mvd/Tobias$ root -l runMvdSim.C
root [0]

Good Morning.

You are using a macro from a "private" macro folder. There is no guarantee that these macros will run. In your specific case the depreciated TPC detector is requested. But it's not in the software anymore.

Please start with macros from macro/run (or similar, depending on your goals).

Cheers.
Ralf
