Hello,

the posted ticket is

https://subversion.gsi.de/trac/fairroot/ticket/98

but maybe somebody has a workaround?

Hi,

Which externals version and which release (svn release of pandaroot) you are using.

Mohammad

Both latest. pandaroot from trunk and apr13, or so fairsoft, otherwise root would not compile

This error has nothing to do with Fedora 16 or 18 or with the external packages. it was introduce to Pandaroot on 06/04/13 by removing the empty implementation of the virtual function " virtual TVector3 GetVector?(TObject* obj);"

I added the method to r 19295. it should work now

Hi,
I removed the empty implementation because I was not sure what should be there and it seemed buggy to me, without doing what it should now. In my case I did not see errors in my

---

PC.
However, maybe it would be better to put the proper implementation or to remove the function.

Hi,

the empty method is needed because it overwrites a pure virtual method in FairBoxSetDraw.
Otherwise it would not be possible to create an instance of PndTrackCandDraw.

Cheers,

Tobias
