Subject: submit job on a particular CE

Dear all,
is there a way to submit a job on a particular machine?
What is the sintax to put this constraint as a requirement?
I would like to submit the job where there are the following packages:
"pbarprod@panda_extern::apr13",
"pbarprod@pandaroot::rev20840"

that means only at KVI, Vienna or here in Turin.

Thanks in advance,
Best Regards,
Laura

Dear Laura,

you can request a specific Site/CE with a line like this
Requirements = (other.CE=="PANDA::Juelich::ce642");
or with more than one CE
Requirements = (other.CE=="PANDA::Juelich::ce642" || other.CE=="PANDA::KVI::PBS");

to get a list i just don't remember the correct syntax, another admin should help me out ,-)

but the CEs you need are (i guess)
PANDA::Torino::PBS
PANDA::KVI::PBS
PANDA::Vienna::smigrid02

i will have a look at Juelich next week to check for your Packages

cheers,
Rene

Dear Rene,
thanks, in this way it works on the correct CE.
At least I don't have to hope for fate!

Cheers,

Laura
