Dear all,

I'm trying to run macro/run/sim_complete.C macro. I've slightly modified the default one and my version is attached.

While simulation I'm getting the following warnings in huge amounts:

```
++++ TG4Warning: ++++
   TG4MCGeometry::GetTransformation:
   Daughter volume &stt01assembly in
/cave_1/&stt01assembly_0%stt01tube_4323/stt01gas_1 does not exist.
++++++++++++++++++++++

++++ TG4Warning: ++++
   TG4MCGeometry::GetTransformation:
   Daughter volume &stt01assembly in
/cave_1/&stt01assembly_0%stt01tube_4448/stt01gas_1 does not exist.
++++++++++++++++++++++
```

Are they harmless?

Best regards,
Maria Patsyuk

I suppose they are connected to different g4Config settings, with the default options it works.
