
Subject: [FIXED] crash in run/reco_complete.C
Posted by [Maria Patsyuk](#) on Wed, 15 Jan 2014 08:47:41 GMT
[View Forum Message](#) <> [Reply to Message](#)

Dear all,

after successful run of sim_complete.C with Geant3, and digi_complete.C with commented out GEM task I'm getting a crash with reco_complete.C. To remind you, I don't use all the detectors, there are no magnet, GEM, EMC, SciTil, MDT, FTS, FTOF, RICH in my simulation. The error looks like this:

```
root -l reco_complete.C
root [0]
Processing reco_complete.C...
FairRootManager::OpenOutFile("reco_complete_new.root")
Info in (PndGeoHandling::Instance): Making a new instance using the framework.
fRun->Init()
[INFO ] The input consists out of the following trees and files:
[INFO ] - cbmsim
[INFO ] - sim_complete_new.root
[INFO ] - FriendTree_1
[INFO ] - digi_complete_new.root
[INFO ] Parameter and input file are available, Assure that basic info is there for the run!
[INFO ] The number of entries in chain is 100000
```

```
*****
```

```
initialisation for run id 1389607814
```

```
*****
```

```
-l- FairRunTimeDB::InitContainer() FairBaseParSet
[ERROR ] init() FairBaseParSet not initialized
Error in <FairRuntimeDb::initContainers(>: Error occured during initialization
-l container name PndGeoSttPar
Fatal in <PndGeoHandling::PndGeoHandling>: No gGeoManager found.

Strange that the gGeoManager is not found, have you properly set the parameter root file? It should be stored there.
Can you upload your sim/digi/reco macros?

no crash for me.

So please report your sub-version of panda root, and more related information in your testing.

Hi,

Same here. Worked fine. Maybe rerun everything from scratch and check that nothing additional is changed.

Stefan
