Dear all,
Next PandaRoot SeeVogh is scheduled for Monday 24th February, 10:00 AM CET.
Since up to now I received no requests for talk, if you want to discuss or show something please let me know.
However, apart from the standard topics, I would like to discuss about the analysis campaign that most probably will be requested by the Collaboration Board, with a reduced setup for the first days of our experiment.

Hi,

I attached some slides concerning DIRC PID and tracking efficiency.

Best,
Klaus

Seevogh does not run for my on OS X anymore. The application crashes as soon as I enter the room...
Let's see if I can make it in another way...
